

The main outcomes anticipated from **InnovAfrica** but are not limited to, the following:

- A better understanding of the needs and opportunities of SAI in Africa
- Knowledge and innovation capacity of farmers including women and youth to implement SAI systems through IIAs, and EASs increased
- Effectiveness and efficiency of the product value chains improved through viable IIAs and policy
- A better knowledge of public-private partnerships to strengthen agri-business models in case countries with a view to upscaling or replicating successes in other regions through functional MAPs
- Wider dissemination of SAI systems to smallholder farmers and women outside project areas through effective use of smart phones and social media
- The EU-Africa Research and Innovation Partnership on FNSSA strengthened
